Call for Papers

International Workshop on Historical Water Sustainability

03 September 2019: 09.00-13.15 hours (tbc)

Bali, Indonesia

SCOPE: In view of ICID vision 2030, water sustainability would be the key and most important issue in time to come. At the start of the 21st century, humankind established itself on a non-sustainable course - a course that, unless corrected, will lead to catastrophes and awesome consequences. In this context, the water wisdom of the past, which has been achieved over a period of hundreds of years, can be regarded as a unique and irreplaceable gift from our ancestors to our generation facing the crucial challenge of ensuring sustainable development. In this context, Working Group on History of Irrigation, Drainage and Flood Control (WG-HIST) is organizing this International Workshop on “**Historical Water Sustainability**”.

OBJECTIVES: The main objectives for organization of the workshop are:

- To deepen the understanding of World Water Wisdom on sustainability;
- To discuss different aspects of Historical water sustainability;
- To present the key conclusions of publication of WG-HIST on Historical Water Sustainability;
- To present a summary of Recognition of World Heritage Irrigation Structures (WHIS) Scheme.

THEME /SUB-THEMES: The abstracts/ papers are invited from the professionals, researchers, experts, and scientists from private and government sectors on the following theme and sub-themes as per the deadlines given below:

Theme: Historical Water Sustainability

Sub-themes: 1. Worldwide experiences on Water Sustainability; 2. Case studies of sustainable historical water schemes; and 3. Water Wisdom of the past and relevant case studies

SCHEDULE FOR SUBMISSION OF ABSTRACTS / FULL PAPERS

- | | |
|--|-----------------|
