Editor's Choice

The papers shown under Editor's choice have been selected based on their innovative character, as well as on their importance for global food production and improvement of governance with respect to water management systems and flood protection provisions. They illustrate the spectrum and global spreading of topics that are dealt with in *Irrigation and Drainage* as one of the leading journals in the fields of water management and flood protection. The authors belong to the top experts in the sector and are well recognised by their colleagues.

Water, food and energy supply chains for a green economy

Willem F. Vlotman and Clarke Ballard

Integrated management tool for water, crop, soil and N-Fertilizers: The SALTMED model

Ragab Ragab

Performance assessment for irrigation water management: Case study of the Great Chao Phraya Irrigation scheme
