**STATEMENT SETTING OUT CRITERIA FOR  
REPORTING FIGURES ON AREA IRRIGATED AND AREA PROTECTED  
BY DRAINAGE WORKS IN EACH MEMBER COUNTRY**

Figures of areas benefited will be required under two headings:

- (a) Irrigation
- (b) Drainage

For the purpose of calculating each country's interest, the area benefited will be taken as the sum of (a) plus (b).

**Irrigation**

The figure required is the area capable of being irrigated by existing installation or equipment together with the additional area which will be capable of being irrigated during the next five years.

The word "capable" should be interpreted as including the whole irrigable area covered by irrigation systems and not simply the area irrigated in each year.

It applies to the net area and should exclude such things as channels, roads, buildings and the like.

**Drainage**

The figure required is the area which for agricultural purposes depends upon any form of artificial (man-made) drainage works together with any areas depending upon the maintenance or improvement of natural channels.

- (1) Land depending upon more than one form of drainage works should be included once only.
- (2) Land which is irrigated and also drained should be included under irrigation and not under drainage (that is, it counts once only).
